Technical Skills

Languages: Python, Java, C, C++, SQL

Core CS Fundamentals: Data Structures & Algorithms, Complexity Analysis, Object-Oriented Design, Operating Systems, Design Patterns, Concurrency, Distributed Systems

Frameworks: Django, Django REST Framework, FastAPI, Flask

Frontend: ReactJS, Tailwind CSS

Databases: MySQL, PostgreSQL, SQLite, Relational Databases

Systems & API Design: RESTful API Design, Scalable & Fault-Tolerant Systems, Event-Driven Architecture, RBAC, JWT Authentication, Software Design

Cloud & DevOps: AWS EC2, AWS RDS (MySQL, PostgreSQL), AWS S3, AWS SNS, AWS CloudFront, Distributed Storage & Query Systems

Tools: Git, GitHub, Linux/Bash

Education

United School of Business Management, BPUT

Sep. 2025 – June 2027

Master of Computer Applications (MCA)

Bhubaneswar, Odisha

Projects

LIT India CRM | Python, Django, DRF, PostgreSQL, AWS EC2/RDS/S3/SNS/CloudFront

April 2026

- Designed and built a **production-grade, distributed software system on AWS EC2** across **12 decoupled domain modules** (academics, attendance, auth, fees, marketing, faculty, students), applying **object-oriented design** and complexity-aware architecture to keep the system **scalable, low-cost, and easy to manage**.
- Designed, implemented, and tested **107 RESTful API operations across 66 endpoints** (JWT-secured, UUID-keyed, paginated) backed by Django ORM with **PostgreSQL on AWS RDS**; integrated **AWS SNS** for **asynchronous, event-driven, fault-tolerant** notifications, decoupling the notification layer from core business logic.
- Configured **AWS S3** for distributed file/media storage and **AWS CloudFront CDN** for low-latency, high-scale content delivery; enforced environment-based secrets management, **unit and integration testing**, and role-specific API access patterns for secure, production-ready deployment in an **agile** workflow.

AlgoSense – Full-Stack EdTech Platform | Python, Django, DRF, FastAPI, React, SQLite

Sept 2025

- Architected a **scalable, multi-tiered software application** with **15+ decoupled, modular Django apps**, applying **object-oriented programming, design patterns** (MVC, Repository, Signal-based event handling), and complexity analysis to keep the codebase clean, maintainable, and industry-standard.
- Implemented **RESTful APIs** for authentication (**OTP, JWT, RBAC**), course enrollment, tutor booking, live classes, and payment tracking; used **Django signals for concurrent, event-driven** notification flows and applied **unit and end-to-end testing** at each layer.
- Modeled complex **relational database schemas in SQLite** with optimized, low-latency queries; enforced protected routes, media handling, and deployment-ready configuration through **iterative, ambiguity-tolerant problem-solving** to ensure long-term system reliability.

Experience

Lakshya Institute of Technology

Nov 2022 – Present

Assistant Faculty – Programming & Data Structures

Bhubaneswar, Odisha

- Taught **Python and Java programming** and **Data Structures & Algorithms** to **1000+ students**, covering **object-oriented design, complexity analysis, concurrency, sorting, dynamic programming, graph traversal, and trees** through hands-on coding sessions.
- Designed **200+ practice problems and mock assessments** across core CS domains — **arrays, linked lists, recursion, dynamic programming, graphs, and object-oriented design** — aligned with industry-level software engineering and algorithmic problem-solving expectations.
- Mentored students on writing **clean, efficient, and testable code** in Python and Java; guided them on **RESTful API design and consumption**, debugging broadly-defined and ambiguous problems, and collaborating with faculty to raise technical training standards.

Certifications & Achievements

LeetCode – Active Problem Solver (Arrays, Trees, Graphs, DP, Recursion, Algorithms)

leetcode.com/u/ashuCodes

HackerRank – Gold Badges in C, C++, Java, Python & Problem Solving

hackerrank.com/profile/ashutoshbehera21
